

Shilpa Tali

Front-End Developer

📍 Trier, Germany | 📞 Contact: +49 17684786179 | ✉️ shilpasudhish@gmail.com | 🌐 [LinkedIn](#)

SUMMARY

Software Developer with 4 years of experience in MuleSoft integration and over 1 year in front-end development (React.js, HTML5, CSS3, JavaScript, Redux). Proven expertise in building scalable APIs, optimizing data flow, and integrating complex systems. Currently focusing on creating responsive, user-friendly web applications using React and Tailwind CSS. Experienced in developing dynamic, data-driven interfaces and continuously expanding skills to improve development efficiency.

WORK EXPERIENCE

SOFTWARE DEVELOPER, ALLES.AUTO AG

05/2023-Present

- Startup Environment: Operated in an agile, fast-paced startup environment, contributing to both front-end development and system integrations to support rapid company growth.
- Engineered cross-platform responsive user interfaces with React.js and Tailwind CSS, enhancing loading times by 40% across all devices while creating seamless interactions for users.
- Upgraded Alles Auto's interface, transitioning from the Legacy UI, resulting in a 25% increase in positive client bookings and improving the site's responsiveness and usability.
- Authored detailed API specifications that streamlined interdepartmental communication, resulting in a significant reduction of new employee ramp-up time from six weeks to three weeks post-implementation.
- Implement a comprehensive API testing framework using Postman and automated scripts, cutting down manual testing time by 60% and accelerating release cycles by 30%.
- Collaborated with the UX Design team to improve User Experience by tailoring a new approach for categorizing bookings and purchases.
- Engineered and optimized REST APIs using JavaScript, achieving seamless integration with front-end systems; facilitated real-time data exchange that improved user engagement.

SOFTWARE ENGINEER, IQVIA

07/2020-03/2023

- Led the migration from Mule 3 to Mule 4, improving system reliability by 30% while leveraging REST and SOAP protocols to enhance the scalability and maintainability of the system architecture.
- Deployed integration solutions using MuleSoft's platform for 10+ clients across different industries, leveraging RESTful APIs to achieve a 30% increase in customer satisfaction through optimized data transfer speeds and reliability.
- Collaborated with cross-functional teams to troubleshoot and resolve system issues, maintaining 99% uptime for critical systems.
- Refined and transformed technical program specs from business requirements to code, test, and debug programs, leading to a 30% increase in system performance and a 15% reduction in maintenance costs.
- Led 6 workshops and coached interns, focused on API technologies; improved team proficiency by developing hands-on exercises, which decreased onboarding time for new hires from three weeks to just two.

EDUCATION

Diploma in Full Stack Web Development

Ongoing

Career Foundry

Masters in Computer Applications

06/2017-05/2020

Cochin University of Science and technology, India

PROJECTS

Alles Auto Integration Platform - ALLES.AUTO AG

- Built a comprehensive platform for car sales and purchases, focusing on creating a smooth, user-friendly experience for customers to browse and purchase cars, accessories, and book workshops.
- Integrated front-end interfaces with back-end APIs to ensure seamless data flow between auto dealers and end users, enhancing real-time updates for availability and pricing.
- Achieved a next-generation user interface with React.js, focusing on responsive, dynamic, and form-based architecture to improve customer interactions.

Alles Auto Integration Platform (ALLES.AUTO AG)

- Craft a robust integration solution using MuleSoft's Anypoint Platform, connecting 5+ dealership platforms in real-time for seamless communication and data synchronization, boosting customer satisfaction by 40% and increasing retention rates by 25%.
- Develop and implement robust deployment strategies utilizing Git workflows alongside CI/CD practices tailored for MuleSoft environments, resulting in fewer integration errors during production rollouts.
- Revitalize the Enterprise Integration architecture by deploying RAML for API design and Maven for project automation, catalyzing a 30% surge in system reliability and scalability.

Pfizer-BioNTech vaccine distribution systems (IQVIA)

- Composed a Mule-based interface that streamlined the transfer of more than 10,000 real-time data points from medical organizations and professionals, ensuring 100% system uptime.

SAP, Concur, and AGS 360 Integrations (IQVIA)

- Launched Mule-based interfaces for data management on Salesforce platforms and SFTP locations, integrating Salesforce and external REST APIs, reducing development time by 25%.

SKILLS

Tools	VS Code, Swagger, Postman, GitHub, Notion, NPM, Cloud Hub, Salesforce, Jira, Confluence.
Languages	JavaScript (ES6+), HTML5, CSS3.
Frameworks & Libraries	MuleSoft Anypoint Platform, React.js, Redux, TailwindCSS, Shadcn, Node.js, Express.js.
API Technologies	REST, SOAP, JSON, XML, RAML.
Workflow/Methodologies	SCRUM, Agile.
